

Cambridge Advanced is for learners aged 16 to 19 years who aspires to advanced study in preparation to university and higher education.

Thousands of learners use Cambridge International AS & A Level every year to gain places at leading universities worldwide. Students develop a deep understanding of subjects, as well as independent learning and constructive thinking skills – abilities which universities value highly. Cambridge International A Level is typically a two-year course, and Cambridge International AS Level is typically one year.

The curriculum aims to develop learners' knowledge, understanding and skills in:

- In-depth subject content.
- Independent thinking.
- Applying knowledge and understanding to new as well as familiar situations.
- Handling and evaluating different types of information sources.
- Thinking logically and presenting ordered and coherent arguments.
- Making judgements, recommendations and decisions.
- Presenting reasoned explanations, understanding implications and communicating them clearly.
- Working and communicating in English.

ASSESSMENT

Cambridge International AS & A Levels follow a linear structure with exams at the end of the course, which gives more time for teaching and learning. Many of the world's top universities have made clear their appreciation of this linear approach, and we share their belief that linear courses allow learners to develop a deeper understanding of subjects.

Learners can choose from a range of assessment options:

- Take the Cambridge International AS Level Examination only at the end of Grade 11. The Cambridge International AS Level syllabus content is half a Cambridge International A Level.
- Take a 'staged' assessment route – take the Cambridge International AS Level in one examination series and complete the final Cambridge International A Level in a subsequent series (i.e. AS Level in 2025-2026 and A2 Level in 2026-2027).
- Take all papers of the Cambridge International A Level course in the same examination series, usually at the end of the course (i.e. in 2026-2027).

CAMBRIDGE INTERNATIONAL AS & A LEVEL

Cambridge International Examinations prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. The international qualifications offered are recognised by the world's best universities and employers, giving students a wide range of options in their education and career. Cambridge programmes and qualifications have a proven reputation for being an excellent preparation for university, employment and life. Leading universities and employers worldwide value and recognise Cambridge qualifications as evidence of academic ability.

The Cambridge approach supports schools to develop learners who are:

- Confident in working with information and ideas – their own and those of others.
- Responsible for themselves, responsive to and respectful of others.
- Reflective as learners, developing their ability to learn.
- Innovative and equipped for new and future challenges.
- Engaged intellectually and socially, and ready to make a difference in the world.

Cambridge programmes and qualifications are carefully designed to engage learners and give them solid foundations to achieve high levels of academic and personal attainment. The programmes are progressive, giving learners a clearly defined path to success from 5 to 19 years. The four stages lead seamlessly from primary to secondary and pre-university years, and each stage builds on the learners' development from the previous one.

The syllabuses are international in outlook, but retain a local relevance. They have been created specifically for an international student body with content to suit a wide variety of schools and avoid cultural bias.
